Solid biofuels - Terminology, definitions and descriptionsBiocomustibles solides - Terminologie, définitions et
descriptionsFeste Biobrennstoffe - Terminologie, Definitionen und
Beschreibungen

This European Standard was approved by CEN on 12 September 2010.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 14588:2010) has been prepared by Technical Committee CEN/TC 335 "Solid biofuels", the secretariat of which is held by SIS.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 2011, and conflicting national standards shall be withdrawn at the latest by April 2011.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes CEN/TS 14588:2003.

Annex A and Annex B are informative.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Introduction

This European Standard has been performed in accordance with ISO 10241 [1]. Beside international standards (see References) approved national standards and manuals [2], [3], [4], [5] provided the basis of this European Standard. Moreover, some terms important within specific nations were added to the international terminology during compilation of this document.

Waste is defined in Article 1(a) of Council Directive 75/442/EEC [6] and some of the given terms fall within this category. However, sources within the scope of this European Standard are excluded from the scope of Directive 2000/76/EC ("waste incineration directive") [7]. In this European Standard, instead of the legal definition waste the technical term *residue* is used for well-defined side-streams from agricultural, forestry and related industrial operations. The terms and definitions are harmonised as far as possible with the current language used in management as well as in regulatory activities.

1 Scope

This European Standard defines terms concerned in all standardisation work within the scope of CEN/TC 335. According to CEN/TC 335 this European Standard is applicable to solid biofuels originating from the following sources:

- products from agriculture and forestry;
- vegetable waste from agriculture and forestry;
- vegetable waste from the food processing industry;
- wood waste, with the exception of wood waste which may contain halogenated organic compounds or heavy metals as a result of treatment with wood preservatives or coating, and which includes in particular such wood waste from construction- and demolition waste;
- cork waste;
- fibrous vegetable waste from virgin pulp production and from production of paper from pulp, if it is co-incinerated at the place of production and heat generated is recovered.

The embedding of the scope within the biomass/biofuel field is given in Figure 1.

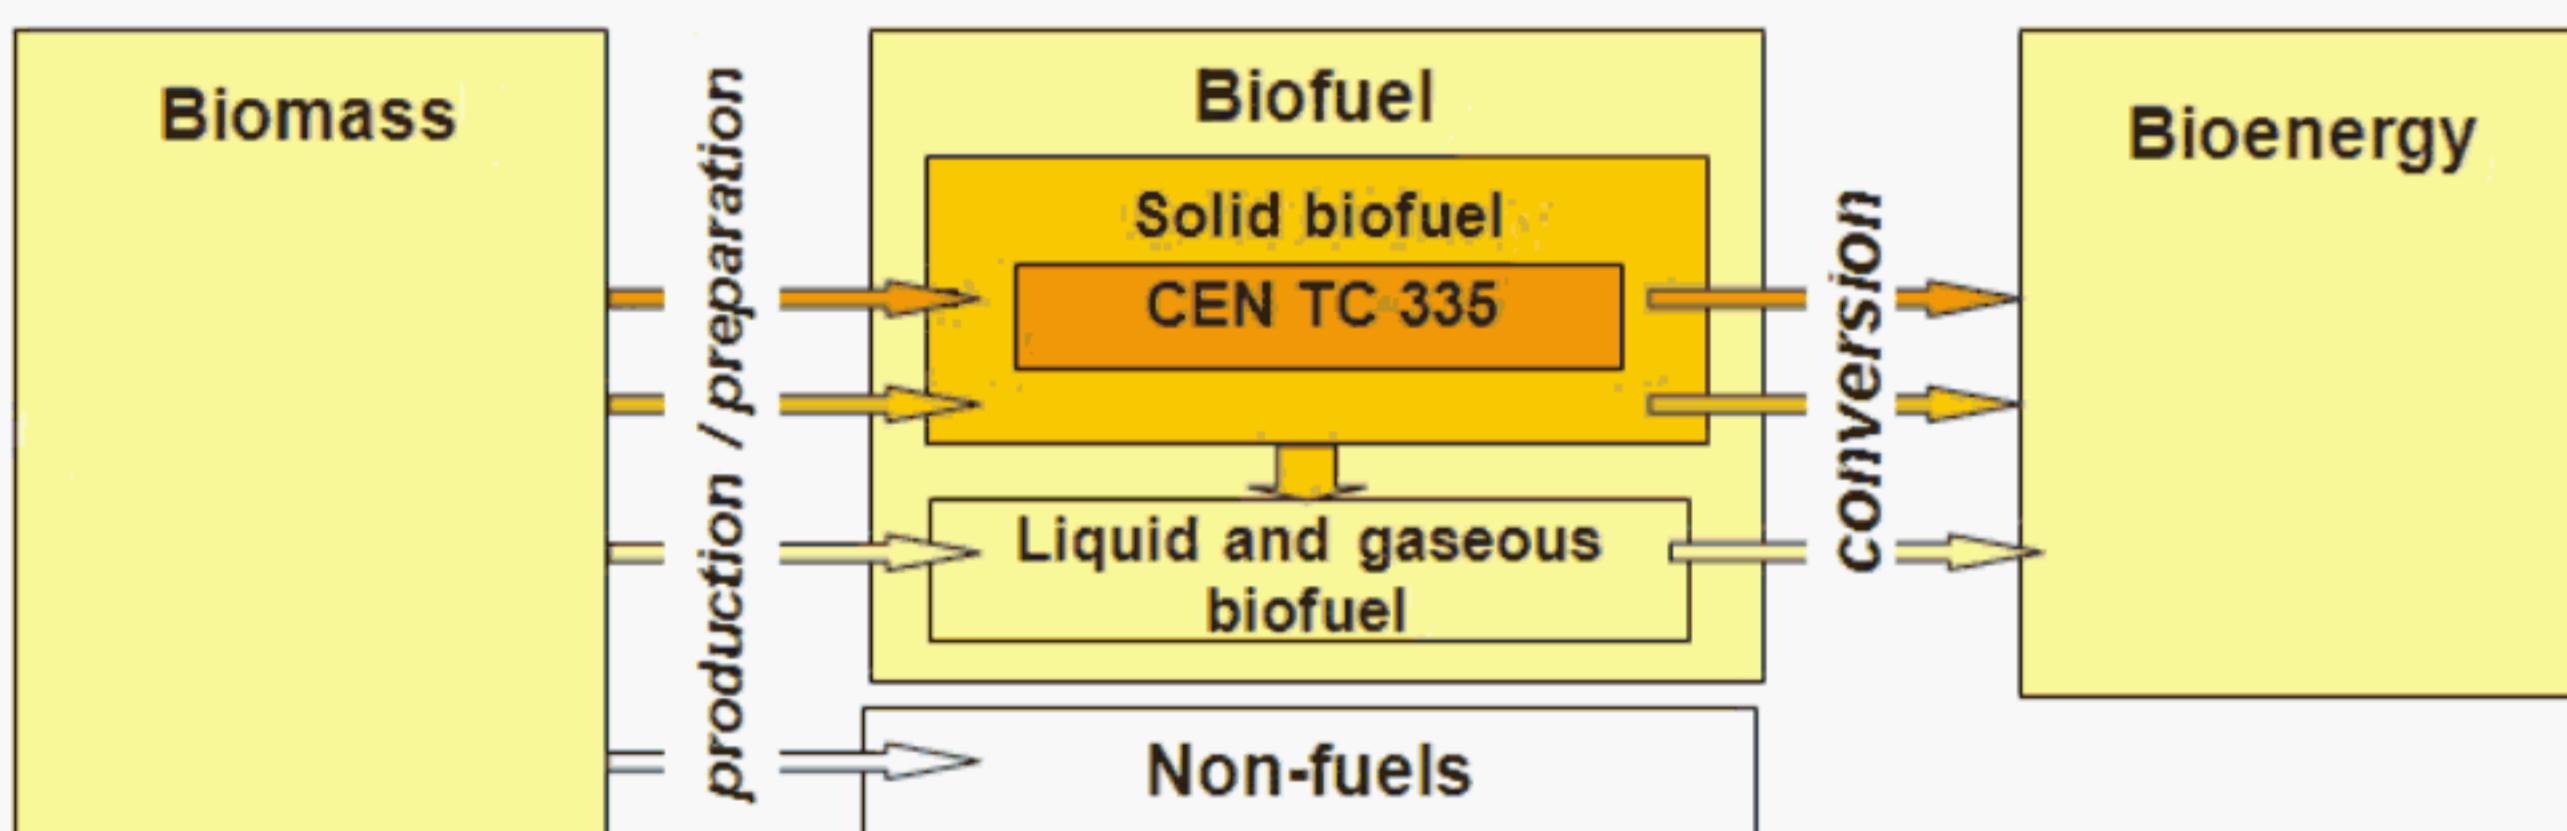

Figure 1 — CEN TC 335 within the biomass-biofuel-bioenergy field

NOTE 1 CEN/TC 335 considers that wood waste, including wood waste originating from construction and demolition waste are included in the scope of CEN/TC 335 and of the scope of the mandate M/298 "solid biofuels", unless they contain halogenated organic compounds or heavy metals as a result of treatment with wood preservatives or coatings [8].

NOTE 2 There are more terms included within this European Standard as covered by the mandate due to clarification and differentiation.

NOTE 3 Changes of ownership of the fibrous vegetable waste between paper and pulp company and the operator of the co-incineration plant in which the waste is used does not affect the inclusion of the waste in the scope of mandate M/298.

Other standards with a different scope than this European Standard can have different definitions than this standard.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

Not applicable.

3 Principle

Solid biofuels are produced from different sources, which are defined within the scope of CEN TC 335 "Solid biofuels". Terms and definitions are categorised in a logical structure based on the fact that solid biofuels are produced from different sources and that the purpose of solid biofuels is the conversion into bioenergy:

- the sources of solid biofuels cover the initial location of the input material (biomass) in the economic and environmental cycles (like forest wood, energy forest trees, logging residues, landscape management residues, etc.);
- the description of the solid biofuels itself as well as their handling, which covers the source and origin of the biofuel given in the same structure as the biomass sources (e.g. wood fuels, forest fuels), the different forms of biofuels produced within the preparation process (i.e. chipped biofuels, bundled biofuels), the most relevant biofuel properties (e.g. total moisture, total ash), and terms of sampling and testing as well as classification and specification;
- bioenergy as the result of biofuel conversion.

Appropriate terms for sampling and testing as well as classification and specification of properties have to be defined and described together with the category *source/origin, forms and properties of solid biofuels*. The structure of this European Standard (Table 1) is based on the classification system of solid biofuels given in [9], in which the classification of solid biofuels is specified more detailed.

Table 1 — Structure of the terms [9]

Sources of biofuels	Woody biomass Herbaceous biomass Fruit biomass Biomass blends and mixtures
Solid biofuels	Source/origin Traded forms Sampling and testing Properties Classification and specification
Bioenergy	

4 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

NOTE Many terms defined within this document are also used in the standardisation work of CEN/TC 343, especially in prEN 15357, *Solid recovered fuels — Terminology, definitions and descriptions*. Therefore, an informative list of terms defined by prEN 15357 is given in Annex B.

4.1

additive

material which improves quality of fuel (e.g. combustion properties), reduces emissions or make production more efficient

4.2

agricultural residues

biomass residues originating from production, harvesting, and processing in farm areas

NOTE See also *crop production residues*.

4.3

agrofuels

biofuels obtained as a product of energy crops and/or agricultural residues

NOTE Adapted from FAO unified bioenergy terminology (UBET) [10].

4.4

air dried basis

condition in which the solid biofuel is in equilibrium with the atmospheric humidity

[Adapted from ISO 1213-2:1992]

4.5

animal husbandry residues

agricultural residues originating from livestock keeping

NOTE 1 It includes among others solid excreta of animals.

NOTE 2 Animal husbandry residues are not included in the scope of CEN/TC 335. The term is included for information only.

4.6

as analysed

determined basis

condition in which the moisture content of the solid biofuel is the content at the moment of analysis/determination

[Adapted from ISO 1213-2:1992]

4.7

as received basis

as received

as delivered

calculation basis for material at delivery

4.8

ash

solid mineral residue obtained from a complete *fuel* combustion

[Adapted from ISO 1213-2:1992]

NOTE Depending on the combustion efficiency the ash may contain combustibles.

4.9

ash deformation temperature

DT

temperature at which the first signs of rounding of the edges of the test pieces occurs due to melting

4.10

ash flow temperature

FT

temperature at which the *ash* is spread out over the supporting tile in a layer, the height of which is one-third of the height of the test piece at the *ash hemisphere temperature*

4.11
ash fusibility
ash melting behaviour
characteristic physical state of the *ash* obtained by heating under specific conditions

NOTE 1 Ash fusibility is determined under either oxidizing or reducing conditions.

NOTE 2 See also *ash deformation temperature*, *ash flow temperature*, *ash hemisphere temperature*, and *ash sphere temperature*.

4.12
ash hemisphere temperature
HT
temperature at which the test piece forms approximately a hemisphere, i.e. when the height becomes equal to half the base diameter

4.13
ash sphere temperature
ST
temperature at which shrinking of the test piece occurs

NOTE This temperature is defined as when the area of the piece falls below 95 % of the original test piece area at 550°.

4.14
baled biofuel
bale
solid biofuel which has been compressed and bound to keep its shape and *density*

EXAMPLES Straw bales, bales of energy grass, bales of treetops and branches.

4.15
bark
organic cellular tissue which is formed by taller plants (trees, bushes) on the outside of the growth zone (cambium) as a shell for the wooden body

4.16
basis/bases
convention on measuring quantity

4.17
basic density
ratio of the mass on *dry basis* and the *solid volume* on *green basis*

4.18
bioenergy
energy from *biomass*

4.19
biofuel
fuel produced directly or indirectly from *biomass*

4.20
biofuel blend
biofuel resulting from intentionally mixing of different *biofuels*

EXAMPLES Straw or *energy grass* with wood, dried *biosludge* with bark.

4.21

biofuel briquette

densified biofuel made with or without additives in the form of cubiform, polyedric or cylindrical units, produced by compressing pulverised biomass

NOTE 1 The raw material for briquettes can be *woody biomass, herbaceous biomass, fruit biomass and biomass blends, and biomass mixtures*.

NOTE 2 Biofuel briquettes are usually manufactured in a piston press. The *total moisture* of the biofuel briquette is usually less than 15 % of mass as received.

NOTE 3 Biofuel briquettes for non industrial use are specified in prEN 14961-3.

4.22

biofuel mixture

biofuel resulting from natural or unintentional mixing of different biofuels and/or different types of biomass

4.23

biofuel pellet

densified biofuel made from pulverised biomass with or without additives usually with a cylindrical form, random length typically 3,15 mm to 40 mm, and broken ends

NOTE The raw material for biofuel pellets can be *woody biomass, herbaceous biomass, fruit biomass, or biomass blends and mixtures*. They are usually manufactured in a die. The *total moisture* of biofuel pellets is usually less than 10 % of mass as received.

[Adapted from prEN 14961-2:2010]

4.24

biomass

from a scientific and technical point of view, material of biological origin excluding material embedded in geological formations and/or transformed to fossil

NOTE 1 Biomass is defined in legal documents in many different ways according to the scope and goal of the respective documents (e.g. Directive 2001/77/EC of the European Parliament and the Council; Commission Decision (2007/589/EC) of 18 July 2007). This definition does not contradict legal definitions.

NOTE 2 See also *herbaceous biomass, fruit biomass, and woody biomass*.

4.25

biomass residues

biomass originating from well defined side-streams from agricultural, forestry and related industrial operations

NOTE Adapted from the proposal within the Draft CEN Report Solid Recovered Fuels [11].

4.26

biomass resource owner

body or enterprise with the right to exploit the *biomass resources for energy purposes*

NOTE The biomass resource owner can be a land or forest owner, a company, etc.

4.27

biosludge

sludge formed in the aeration basin during biological waste water treatment or biological treatment process and separated by sedimentation or flotation

NOTE Biosludges are not included in the scope of CEN/TC 335. The term is included for information only.

4.28

black liquor

liquor obtained from wood during the process of pulp production, in which the energy content is mainly originating from the content of lignin removed from the wood in the pulping process

NOTE Black liquor is not included in the scope of CEN/TC 335. The term is included for information only.

4.29

**bridging
arching**

tendency of particles to form a stable arch across an opening and hindering flow

NOTE Adapted to Woodcock and Mason. Bulk Solids Handling [12].

4.30

bulk density

mass of a portion of a solid *fuel* divided by the *volume* of the container which is filled by that portion under specific conditions

[Adapted from ISO 1213-2:1992]

4.31

bulk volume, loose volume

volume of a material including space between the particles

4.32

bundled biofuel, bundle

solid biofuels which has been bound together and where there is a lengthwise orientation of the material

EXAMPLES Bundles of *energy forest trees* and *logging residues*, small trees, or branches and tops.

4.33

calorific value

heating value

q

energy amount per unit mass or volume released on complete combustion

NOTE See also *gross calorific value*, *energy density*, *net calorific value*, and *net calorific value as received*.

4.34

cereal crops

annual crops grown with the main purpose to use the seed for food production

NOTE Some cereal crops can be used as a *solid biofuel*.

EXAMPLES Barley, wheat, rye, oat.

4.35

char

solid partially or non-agglomerated carbonaceous material produced by pyrolysis of *solid fuels*

[Adapted from ISO 1213-2:1992]

4.36

chemical treatment

treatment with chemicals other than air, water or heat (e.g. glue and paint)

4.37

chopped straw

straw which has been cut into small pieces

4.38

chunkwood

wood cut or broken with sharp cutting devices in which most of the material has a typical particle length, substantially longer and more coarse than *wood chips*

NOTE Chunkwood has a typical length of 50 mm to 150 mm.

4.39

combined sample

sample consisting of all the increments taken from a sub-lot

NOTE The increments may be reduced by division before being added to the combined sample.

4.40

common sample

sample collected for more than one intended use

[Adapted from ISO 13909:2001]

4.41

complete tree

harvested tree, including limbs and root system

NOTE See also *whole tree*.

4.42

contamination

make impure by exposure to or addition of a poisonous or polluting substance to a fuel

4.43

cork residues

biomass residues from cork production

4.44

critical control point

point within or between processes at which relevant properties can be most readily assessed

NOTE Critical control points also offer the greatest potential for quality improvement.

4.45

crop production residues

agricultural residues originating from crop production, harvesting, and processing in farm areas

NOTE It includes among others wood, straw, stalks, and husks.

4.46

cross-cut ends

short pieces of *woody biomass* which occur when the ends of logs or sawn timber are cross cut off, with or without bark

4.47

customer

client

organization or person that receives a product

[Adapted from EN ISO 9000:2005]

4.48

cut biofuel

solid biofuel cut into pieces

NOTE See also *chunkwood, firewood, chopped straw, and smallwood*.

4.49

cutter chips

wood chips made as a by-product of the wood processing industry, with or without *bark*

4.50

delivery agreement

contract for fuel trade, which specifies e.g. origin and source, *quality* and quantity of the fuel, as well as delivery terms

4.51

delivery lot

solid biofuel batch on which the essential quality requirements for *solid biofuel* are focused

NOTE 1 *The delivery lot can be an individual delivery lot, which is an agreed quantity of solid biofuel (e.g. a package, shipload or truck load), or continuous delivery, where several loads are delivered to the end-user during an agreed period of time (usually daily or weekly delivery).*

NOTE 2 In continuous delivery, the *delivery lot* is the amount of solid biofuel delivered during a specified period of time, e.g. 24 h, unless otherwise agreed by *supplier* and *end-user*. If the delivery lot in continuous delivery is more than 1 500 m³ – 2 000 m³ in 24 h, it is recommended that it should be divided into two or more individual lots.

4.52

demolition wood

used wood arising from demolition of buildings or civil engineering installations

[Adapted from EN 13965-1:2004]

4.53

densified biofuel

compressed biofuel

solid biofuel made by mechanically compressing *biomass* to increase its *density* and to mould the *solid biofuel* into a specific size and shape such as cubes, pressed logs, *biofuel pellets* or *biofuel briquettes*

NOTE See also *biofuel briquette* and *biofuel pellets*.

4.54

density

ratio of mass to *volume*

NOTE 1 It will always be stated whether the density refers to the density of individual particles or to the bulk density of the material and whether the mass of water in the material is included.

NOTE 2 See also *basic density*, *bulk density* and *particle density*.

4.55

dry ash free

dry ash free basis

calculation basis in which the *solid fuel* is free from *moisture* and *inorganic matter*

4.56

dry

dry basis

calculation basis in which the *solid fuel* is free from *moisture*

[Adapted from ISO 1213-2:1992]

4.57

dry matter

material after removal of *moisture* under specific conditions

4.58

dry matter content

portion of *dry matter* in the total material on mass basis

NOTE Expressed as a percentage of the *total mass* of the *solid biofuel*.

4.59

edgings

parts of *woody biomass* which occur when trimming sawn timber and which show a remainder of the original rounded surface of the tree, with or without *bark*

4.60

end-user

consumer (private person, enterprise, utility, etc.) using fuel for energy purposes

4.61

energy crops, fuel crops

woody or herbaceous crops grown specifically for their *fuel* value

NOTE 1 See also *energy forest trees*, *energy grass*, *energy plantation trees*.

NOTE 2 Fuel crops is a not recommended synonym.

4.62

energy density

ratio of net energy content and *bulk volume*

NOTE The energy density is calculated using the *net calorific value* determined and the *bulk density*.

4.63

energy forest trees

woody biomass grown specifically for its *fuel* value in medium to long rotation forestry

4.64

energy grain

grain used for energy purpose

4.65

energy grass

fuel grass

endogenous plants having simple leaves grown specifically for their *fuel* value

NOTE 1 Belong to the group of *herbaceous biomass*.

EXAMPLES Sugarcane, Miscanthus, Reed canary grass.

NOTE 2 Fuel grass is a not recommended synonym.

4.66

energy plantation trees

woody biomass grown as *short rotation trees* specifically for its *fuel* value

4.67

extraneous ash

ash from contaminants entering the material at harvest, logging, treatment, transport, storage, etc.

4.68

fibreboard residues

woody biomass residues from the fibreboard industry

4.69

fibre sludge

sludge formed in the sedimentation basin as a part of the waste water treatment process in a pulp and paper mill and separated by sedimentation or flotation

NOTE The main component is pieces of wood fibres. The sludge can be dewatered and further processed into a solid biofuel.

4.70

firewood

cut and sometimes split oven-ready *fuelwood* used in household wood burning appliances like stoves, fireplaces and central heating systems

NOTE Firewood usually has a uniform length, typically in the range of 150 mm to 1 000 mm.

[Adapted from prEN 14961-5:2010]

4.71

fixed carbon

remainder after the percentage of *total moisture*, *ash*, and *volatile matter* are subtracted from 100

[Adapted from ISO 1213-2:1992]

4.72

flowability

ability of a bulk solid to flow

NOTE See also *bridging*.

4.73

food processing industry residues

biomass residues originating from the food processing industry

NOTE 1 It includes among others bone meal, press cake from juice production.

NOTE 2 Food processing industry residues are only partly within the scope of CEN/TC 335. Bone meal is e.g. not included.

4.74

foreign material

impurities

material other than claimed, which has contaminated the *fuel*

4.75

forest chips

forest wood in the form of *wood chips*

4.76

forest fuels

wood fuel produced where the raw material has not previously had another use

NOTE Forest fuel is produced directly from forest wood by a mechanical process.

4.77

forest and plantation wood

woody biomass from forests and/or tree plantations

NOTE See also *complete tree*, *energy forest trees*, *energy plantation trees*, *logging residues*, *thinning residues*, *tree section*, and *whole tree*.

4.78

fruit biomass

biomass from the parts of a plant which hold seeds

EXAMPLES Nuts, olives.

4.79

fuel

energy carrier intended for energy conversion

NOTE 1 Fuels are solid, liquid or gaseous.

NOTE 2 Fuels can originate from biomass amongst others.

4.80

fuel classification

division of *fuels* into defined fuel classes

NOTE The aim of classification can be to describe the *fuel* and/or to physically separate certain particle types.

4.81

fuel dust

pulverised fuel with a typical *particle size* of 1 mm to 5 mm

EXAMPLES Saw dust, straw dust.

4.82

fuel powder

fuel flour

pulverised fuel with a typical *particle size* less than 1 mm

EXAMPLES Wood powder, wood flour, straw powder.

4.83

fuel product declaration

document dated and signed by the *producer/supplier* to the *retailer* or *end-user*, specifying origin and source, traded form and properties of defined lot

4.84

fuel specification

document stating the requirements of the *fuel*

4.85

fuelwood

energy wood

wood fuel where the original composition of the wood is preserved

NOTE Adapted from FAO unified bioenergy terminology (UBET) [10].

4.86

general analysis sample

sub-sample of a *laboratory sample* having a *nominal top size* of 1 mm or less and used for a number of chemical and physical analyses

4.87

green basis

condition based on fresh material at specific *total moisture*

4.88

green chips

wood chips made of fresh *logging* and *thinning residues*, including branches and tops

4.89

grinding dust

dust-like wood residue formed in grinding timber and wood boards

4.90

gross calorific value

q_{gr}

measured value of the specific energy of combustion for unit mass of a *fuel* burned in oxygen in calorimetric bomb under the conditions specified

NOTE 1 The result of combustion are assumed to consist of gaseous, oxygen, nitrogen, carbon dioxide and sulphur dioxide, of liquid water (in equilibrium with its vapour) saturated with carbon dioxide under conditions of the bomb reaction, and of solid ash, all at the reference temperature and at constant volume.

NOTE 2 Old term is "higher heating value".

4.91

gross density

ratio of the mass of a wooden body and its volume, including all cavities (pores and vessels), based on specific *total moisture*

4.92

herbaceous biomass

biomass from plants that has a non-woody stem and which dies back at the end of the growing season

NOTE 1 See also *energy grass*.

NOTE 2 Adapted from BioTech's Life Science Dictionary [13].

4.93

herbaceous fuels

all types of *biofuels* originating from *herbaceous biomass*

4.94

hog fuel

fuelwood in the form of pieces of varying size and shape, produced by crushing with blunt tools such as rollers, hammers, or flails

4.95

horticultural residues

biomass residues originating from production, harvesting, and processing in horticulture including greenhouses

4.96

impurities

material other than the fuel itself

NOTE Examples of impurities for biofuels are stones, soil, pieces of metal, plastics, rope, ice and snow.

4.97

increment

portion of *fuel* extracted in a single operation of the sampling device

[Adapted from ISO 13909:2001]

4.98

inorganic matter

non-combustible fraction of *dry matter*

4.99

laboratory sample

sample sent to or received by the laboratory

4.100

landscape management residues

residues of woody, herbaceous and fruit biomass originating from landscape, park, and cemetery management

NOTE It includes among others grass, hay, branches from landscape trees, road side green, and/or wood from shrubs.

4.101

log wood

cut fuelwood in which most of the material has a length of 200 mm and above

4.102

logging residues

woody biomass residues which are created during timber harvesting

NOTE Logging residues include tree tops with branches and they can be salvaged fresh or after seasoning.

4.103

lot

defined quantity of fuel for which the quality is to be determined

[Adapted from ISO 13909:2001]

NOTE See also *sub-lot*.

4.104

major elements

elements in the fuel that predominantly will constitute the ash; including aluminium (Al), calcium (Ca), iron (Fe), magnesium (Mg), manganese (Mn), phosphorus (P), potassium (K), silicon (Si) sodium (Na) and titanium (Ti)

4.105

mass-reduction

reduction of the mass of a sample or sub-sample

4.106

mechanical durability

ability of densified fuel units (e.g. briquettes, pellets) to remain intact, e.g. abrasion and shocks during handling and transport

4.107

minor elements

trace elements

elements in the fuel being presented only at small concentrations

NOTE 1 The term "trace elements" is often used synonymous to minor elements; if the elements are metal, the term "trace metals" is also used.

NOTE 2 Concerning solid biofuels, minor elements in general speech is regarded to include the metals arsenic (As), cadmium (Cd), cobalt (Co), chromium (Cr), copper (Cu), mercury (Hg), manganese (Mn), nickel (Ni), lead (Pb), antimony (Sb), tin (Sn), vanadium (V) and zinc(Zn).

4.108

moisture

water in a fuel

NOTE See also *total moisture* and *moisture analysis sample*.

4.109

moisture analysis sample

sample taken specifically for the purpose of determining *total moisture*

[Adapted from ISO 13909:2001]

4.121

particle size

size of the *fuel* particles as determined

NOTE 1 Different methods of determination may give different results.

NOTE 2 See also *particle size distribution, fine particles and over size particles*.

4.122

particle size distribution

proportions of various *particle sizes* in a solid *fuel*

[Adapted from ISO 1213-2:1992]

4.123

plywood residues

woody biomass residues formed in plywood industry

4.124

point of delivery

location specified in the delivery agreement, at which the proprietary rights of and responsibilities for a *fuel lot* are transferred from one organization or unit to another

4.125

pressing aid

additive used for enhancing the production of *densified fuels*

4.126

producer

organization or unit responsible for the production of the *fuel*

NOTE 1 The *producer* can be responsible for any operation with the purpose of changing the *biofuel* properties.

NOTE 2 The *producer* can also be the *supplier* of the fuel.

4.127

proximate analysis

analysis of a *solid fuel* reported in terms of *ash, total moisture, volatile matter* and *fixed carbon* measured at specified conditions

[Adapted from ISO 1213-2:1992]

4.128

pulverised fuel

solid fuel in the form of dust and powder, produced by milling or grinding

NOTE See also *fuel dust* and *fuel powder*.

4.129

quality

degree to which a set of inherent characteristics fulfils requirements

[Adapted from EN ISO 9000:2005]

4.130

quality assurance

part of quality management, focused on providing confidence that the quality requirements will be fulfilled

[Adapted from EN ISO 9000:2005]

4.131

quality control

part of quality management, focused on fulfilling the quality requirements

[Adapted from EN ISO 9000:2005]

4.132

recovered construction wood

used wood arising from construction of buildings or from civil engineering works

[Adapted from EN 13965-1:2004]

4.133

repeatability

precision under conditions where independent test results are obtained with the same method on representative portions taken from the same *test sample* material in the same laboratory

[Adapted from ISO 1213-2:1992]

4.134

reproducibility

precision under conditions where test results are obtained with the same method on representative portions taken from the same *test sample* material in different laboratories with different operators using different equipment

[Adapted from ISO 1213-2:1992]

4.135

retailer

supplier of (usually packaged) *fuels* in (small) quantities to end-user

NOTE Retailers are usually suppliers to the private household consumers.

4.136

rotary screen

device with cylindrical screens used to separate material into size classes for calculation of particle size distribution

4.137

sample

quantity of material, representative of a larger quantity for which the quality is to be determined

[Adapted from ISO 13909:2001]

NOTE See also *combined sample*, *common sample*, *general analysis sample*, *increment*, *laboratory sample*, *moisture analysis sample*, *size analysis sample*, and *sub-sample*.

4.138

sample preparation

actions taken to obtain representative *laboratory samples* or *test portions* from the original *sample*

4.139

sampling

process of drawing or constituting a *sample*

[ISO 3534-1:1993]

4.140

sampling form

document that should be used during the *sampling* to record data on the way in which the *sampling* is actually being carried out

4.141

sampling plan

predetermined procedure for the selection, withdrawal, preservation, transportation and preparation of the portions to be removed from a population as a *sample*

[ISO 11074-2:1998]

4.142

sampling record

report which serves as a check list and provides the investigator with all necessary information about the *sampling* techniques applied at the site and any additional important information

[ISO 11074-2:1998]

4.143

sample size reduction

size reduction

reduction of the *nominal top size* of a *sample* or *sub-sample*

4.144

sawdust

fine particles created when sawing wood

NOTE Most of the material has a typical particle length of 1 mm to 5 mm.

4.145

short rotation trees

woody biomass grown as a raw material and/or for its *energy* value in short rotation forests

4.146

shredded biofuel

solid biofuel which has been mechanically treated into smaller pieces by blunt tools

EXAMPLES Shredded straw, shredded bark, *hog fuel*.

4.147

size analysis sample

sample taken specifically for the purpose of determining *particle size distribution*

4.148

slabs

parts of *woody biomass* created when cuts are made into the edges of logs and whereby one side shows the original rounded surface of the tree, either completely or partially, with or without *bark*

4.149

smallwood

fuelwood cut with sharp cutting devices and in which most of the material has a particle length typically 50 mm to 500 mm

EXAMPLES *Chunkwood, firewood*.

4.150

solid biofuel

solid fuel produced directly or indirectly from *biomass*

4.151

solid volume

volume of individual particles

NOTE Typically determined by a fluid displaced by a specific amount of material.

4.152

stacked volume

volume of a determined stacked material including the space between the material pieces

4.153

stemwood

part of tree stem with the branches removed

4.154

stemwood chips

wood chips made of *stemwood*, with or without *bark*

4.155

stump

part of the tree stem below the felling cut

NOTE 1 In complete tree utilisation the root system is included in the stump.

NOTE 2 Adapted from Swedish Forestry Vocabulary, TNC 96 [14].

4.156

sub-lot

part of a *lot* for which a test result is required

[Adapted from ISO 13909:2001]

4.157

sub-sample

portion of a *sample*

4.158

supplier

organization or person that provides a product

[Adapted from EN ISO 9000:2005]

NOTE One supplier may deliver to the end-user directly and take responsibility for fuel deliveries from several producers as well as delivery to the end-user.

4.159

supply chain

overall process of handling and processing raw materials to the point of delivery to the end-user

4.160

test portion

sub-sample either of a *laboratory sample* or a *test sample*

4.161

test sample

laboratory sample after an appropriate preparation made by the laboratory

4.162

thinning residues

woody biomass residues originating from thinning operations

4.163

total ash

ash content

mass fraction of the inorganic residue remaining after complete combustion of a *fuel* under specified conditions, typically expressed as a percentage of the mass of *dry matter* in *fuel*

NOTE See also *extraneous ash* and *natural ash*.

4.164

total carbon (C)

content of carbon within moisture free *fuel*

[Adapted from ISO 1213-2:1992]

4.165

total chlorine (Cl)

content of chlorine within moisture free *fuel*

4.166

total hydrogen (H)

content of hydrogen within moisture free *fuel* (dry basis)

[Adapted from ISO 1213-2:1992]

4.167

total mass

mass of all components of the solid fuel, including dry matter and moisture

4.168

total moisture

moisture content

M_T

moisture in *fuel* removable under specific conditions

NOTE Indicate reference (*dry matter / dry basis*, or *total mass / wet basis*) to avoid confusion.

4.169

total nitrogen (N)

content of nitrogen within *moisture free fuel*

[Adapted from ISO 1213-2:1992]

4.170

total oxygen (O)

content of oxygen within moisture free *fuel* (dry basis)

NOTE For *solid biofuels* the amount of *total oxygen* is generally calculated as the remaining portion in the dry fuel from the sum of the *total ash*, the *total carbon*, the *total hydrogen*, the *total nitrogen*, the *total sulphur* and the *total chlorine* in the dry fuel.

4.171

total sulphur (S)

content of sulphur within moisture free *fuel*

[Adapted from ISO 1213-2:1992]

4.172

tree section

part of a tree (with branches) which has been cut into suitable length but not processed

NOTE Tree sections can be processed for example to pulpwood or forest fuel.

4.173

ultimate analysis

elementary analysis

analysis of a *fuel* reported in terms of its *total carbon*, *total hydrogen*, *total nitrogen*, and *total sulphur* measured at specified conditions and *total oxygen* calculated by formula

[Adapted from ISO 1213-2:1992]

4.174

used wood

wood substances or objects which have performed their intended purpose

NOTE 1 See also *recovered construction wood* and *demolition wood*.

NOTE 2 Proposal within the Draft CEN Report Solid Recovered Fuels [11].

4.175

viscose residues

residues from viscose production and processing in which cellulose of wood pulp is treated with high concentrations of sodium hydroxide and carbon disulfide and then dissolved in sodium hydroxide forming a thick solution called viscose

4.176

volatile matter

mass loss, corrected for *moisture*, when a *fuel* is heated out of contact with air under specific conditions

[Adapted from ISO 1213-2:1992]

4.177

volume

amount of space that is enclosed within an object

NOTE 1 It will always be stated whether the volume refers to the *solid volume* of individual particles, the *bulk volume*, or the *stacked volume* of the material and whether the mass of *moisture* in the material is included.

NOTE 2 See also *bulk volume*, *solid volume*, and *stacked volume*.

4.178

water soluble content

amount of an element which can be extracted with water using a specified extraction procedure

4.179

wet basis

basis to which a test result is related in the case where the *solid fuel* contains *moisture*

4.180

whole tree

felled, undelimbed tree, excluding root system

4.181

whole-tree chips

wood chips made of *whole trees*

EXAMPLE *Wood chips* containing stems with bark, branches, needles/leaves.

4.182

wood chips

chipped woody *biomass* in the form of pieces with a defined *particle size* produced by mechanical treatment with sharp tools such as knives

NOTE 1 Wood chips have a subrectangular shape with a typical length 5 mm to 50 mm and a low thickness compared to other dimensions.

NOTE 2 See also *cutter chips*, *forest chips*, *green chips*, *stemwood chips*, and *whole-tree chips*.

[Adapted from prEN 14961-4:2010]

4.183

wood fuels

wood based fuels

wood-derived biofuels

all types of *biofuels* originating directly or indirectly from *woody biomass*

NOTE 1 Adapted from FAO unified bioenergy terminology (UBET) [10].

NOTE 2 See also *fuelwood*, *forest fuels*, and *black liquor*.

4.184

wood processing industry by-products and residues

woody biomass residues originating from the wood processing as well as the pulp and paper industry

NOTE See also *bark*, *cork residues*, *cross-cut ends*, *edgings*, *fibreboard residues*, *fibre sluge*, *grinding dust*, *particleboard residues*, *plywood residues*, *saw dust*, *slabs*, and *wood shavings*.

4.185

wood shavings

cutter shavings

shavings from *woody biomass* created when planing wood

4.186

woody biomass

biomass from trees, bushes and shrubs

NOTE This definition includes *forest and plantation wood*, *wood processing industry by-products and residues*, and *used wood*.

82	fuel powder; fuel flour	Combustible en poudre	puderförmiger Brennstoff	Polvo de combustible	Brændselspulver/Brændselsstøv	poedervormige brandstof	poltoainepöly, poltoainejauho, poltoainejauhe	Brenselpulver	bränslepulver
83	fuel product declaration	Déclaration de la qualité du combustible	Deklaration der Brennstoffqualität	Declaración de calidad del combustible	deklaration af brændselskvalitet	Declaratie van brandstofkwaliteit	poltpaineen tuoteseloste		
84	fuel specification		Brennstoffspezifizierung	Especificación de combustible	Brændsels specifikation	brandstofspecificatie	Poltoainespesifikaatio		bränslespecifikation
85	Fuelwood; energy wood	Bois-énergie	Brennholz, Energieholz	Leña, madera para energía	Brændselstræ; Energitræ	Brandhout	poltopuu, energiapuu		brännved, skogsbränsle
86	general analysis sample	échantillon pour analyse générale	allgemeine Analysenprobe	Muestra para análisis general	Analyseprøve	analyse gereed monster	yleinen analyysinäyte		finmalt prov för fysikalisk/kemisk analys
87	green basis	à l'état vert	erntefrisch	Base verde	Grøn basis	natte basis	kosteana		färskt tillstånd
88	green chips	Plaquette verte	erntefrische Holzhackschnitzel, erntefrisches Hackgut	Astillas húmedas, astillas verdes	Grøn flis	verse houtsnippers	viherhake (tuore hake, mukana neulasia)	Rå flis	färsk flis
89	grinding dust	Poussière de broyage	Schleifstaub	Polvo de lijado, serrín-polvo de tablero	Slibestøv/Pudsestøv	Maalstof	hiontapöly	Pussestøv	slipdamm
90	gross calorific value	Pouvoir calorifique supérieur	Brennwert	Poder calorífico superior	Øvre brændværdi	(hogere) verbrandingswaarde	kalorimetrischen lämpöarvo	Bruttobrennverdi	kalorimetriskt värmevärde
91	gross density	masse volumique brute	Rohdichte	Densidad bruta, densidad en bruto	Partikel densesitet	schijnbare dichtheid	klintolheys		rådensitet
92	herbaceous biomass	Biomasse herbacée	halmgutartige Biomasse	Biomasa herbácea	Urteagtig biomasse	kruidachtige biomassa	ruchomainen biomassa	Plantebiomasse	örkartad biomassa

	English	French	German	Spanish	Danish	Dutch	Finnish	Norwegian	Swedish
93	herbaceous fuels	Combustible herbacée	halmgutartige Brennstoffe	Combustible de origen herbáceo	Urteagtig brændsel	kruidachtige biobrandstoffen	ruchomaiset polttoaineet, peltobiomassa-polttoaineet	Plantebrensel	örtatat bränsle, örtränsle
94	hog fuel	Combustible bois écrasé	grobes Shredderholz	Combustible triturado	Knust træ	no translation / geen vertaling	murske		bränslekross
95	horticultural residues	sous-produits horticoles	Rückstände aus Gärtnereien	Residuos hortícolas	Restprodukter fra gartnerier	reststoffen uit de tuinbouw	puutarhatähteet		trädgårdssöder, rester från trädgårdsodling
96	impurities	impuretés	Verunreinigungen	impurezas		Verontreinigingen	epäpuhtaudet		
97	increment	prélèvement élémentaire	Einzelprobe	Incremento	Delprøve; inkrement	Increment	yksittäisnäyte, primäärinäyte		delprov
98	inorganic matter		anorganische Substanz	Materia inorgánica	Uorganiske bestanddele	anorganische bestanddelen	epäorganinen aines	Mineralstoff	oorganiskt material
99	laboratory sample	échantillon de laboratoire	Laborprobe	Muestra de laboratorio	Laboratorieprøve	laboratorium-monster	laboratorionäyte		laboratorieprov, prov avsett för analys vid laboratorium
100	landscape management residues	sous-produits de l'aménagement paysager	Rückstände aus der Landschaftspflege	Residuos procedentes de labores de conservación y mejora del paisaje	Restprodukter fra landskabspleje	reststoffen uit het landschapbeheer	maisemanhoidon tähteet		biomassereseter från landskapsvård
101	log wood	Bûche	Scheitholz (Meterscheiter)	Troza, leño	Stammetræ	Stamhout	halko	Stammeverke	helved
102	logging residues	Rémanents forestiers	Waldrestholz	Residuos de corta	Hugstaffald	Kapresten	hakkutähde	Avverkningsrester	Avverkningsrester
103	lot	lot	Partie	Lote	Parti	Partij	erä, toimituserä		parti (som ska kvalitetskontrolleras)
104	major elements	éléments majeures	Hauptelelemente	Elementos mayoritarios		Hoofdelementen	pääalkuaineet		
105	mass-reduction	réduction de la masse	Mengenreduktion	Reducción de masa	Massereduktion	Massareductie	massan (painon) vähentymisen		reduktion av provmängd
106	mechanical strength, mechanical durability	Résistance mécanique	mechanische Festigkeit	Resistencia mecánica, durabilidad mecánica	Mekanisk styrke	mechanische sterke	mekaaninen kestävyys, mekaaninen lujuus	Holdbarhet	mekanisk hållfasthet, mekanisk hållbarhet
107	minor elements	éléments mineurs	Spurenelemente	Elementos minoritarios		sporenelementen	hivenalkuaineet		
108	moisture	Humidité	Wassergehalt	Humedad	Fugt / vand	Vocht	kosteus	Fuktighet	fukt
109	moisture analysis sample	échantillon pour analyse d'humidité	Probe für die Wassergehaltsbestimmung	Muestra para análisis de humedad	Prøve til bestemmelse af totalvand	monster voor vochtanalyse	kosteusnäyte		Fukthaltsprov
110	natural ash	Cendre non exogène	vom Brennstoff stammende mineralische Rückstände	Contenido en ceniza de un combustible no contaminado	Naturlig aske	natuurlijk as	tuhka (luonnollinen)	Naturlig askeinneheld	naturlig askhalt

	English	French	German	Spanish	Danish	Dutch	Finnish	Norwegian	Swedish
111	net calorific value	Pouvoir calorifique inférieur	Heizwert	Poder calorífico inferior	Nedre brændværdi	stookwaarde, lagere verbrandingswaarde	tehollinen lämpöarvo	Nettobrennverdi	effektivt värmevärde
112	nominal top size	Taille maximale acceptable	nominelle Siebgröße	Tamaño nominal superior	Nominelt største kornstørrelse	nominale zeefgrootte	nimellisesti suurin palakoko		(sållstorlek som 95% av materialet passerat)
113	operator	opérateur	Betreiber	operador	operator	Operateur	toimija		
114	organic matter	Matière organique	organische Substanz	Materia orgánica	Organiske bestanddele	Organische Bestandteile	orgaaninen aines	Organisk stoff	organskt material
115	oscillating screen classifier	Tamis oscillant	Siebanalysegerät mit oszillierenden Sieben	Clasificador de pantalla oscilante	Rystesold	Schudzeef	täryseula		Skaksåll
116	oven dry wood	Bois anhydre	ofentrockenes Holz	Madera seca en estufa	Ovntørt træ	ovendroog hout	uuniuiva puu		absolut torr ved
117	over size particles	surcalibre	übergroße Partikel	Partículas de tamaño excesivo	Overstørrelse	overmaatse deeltjes	yliuurut kappaleet	Overstore partikler	överstora partiklar
118	particle	particule	Partikel	partícula	partikel	Deeltje	kappale, partikkeli		partikel
119	particle board residues	Chutes de panneaux de particules	Spanplattenrückstand; Pressplattenrückstand	Residuos de tablero aglomerado	Spänplade restprodukter	spaanplaatresten	lastulevytähheet		Spånskiverester
120	particle density	Masse volumique unitaire	Partikeldichte	Densidad de partícula	Partikelmasseylde	deeltjesdichtheid	näennäistihleys, "vesitihleys"	Partikkeldensitet	partikeldensitet, fastdensitet
121	particle size	Granulométrie	Partikelgröße	Tamaño de partícula	Partikelstørrelse; Komstørrelse	deeltjesgrootte	palakoko	Partikelstørrelse	Partikelstorlek
122	particle size distribution	Distribution granulométrique	Partikelgrößen-verteilung	Distribución de tamaño de partícula	Partikelstørrelse fordeling; Komstørrelsesfordeling	deeltjesgrootte-verdeling	palakokojakauma	Partikelstørrelsесfordeling	partikelstorleksfördelning
123	plywood residues	Chute de panneaux contreplaqué	Rückstände der Sperrholzherstellung	Residuos de tablero contrachapado	Krydsfineraffald	multiplexresten	vaneritähheet	Kryssfinerester	Plywoodrester
124	point of delivery	point de livraison	Anlieferungsort; Liferort	Punto de entrega	leveringssted	Leverpunkt	toimituspaikka		leveranspunkt
125	pressing aid, additives	Adjuvant de densification	Bindemittel	Ayudante de prensado, aditivos	Bindemiddel	bindmiddel	sideaineet (puristukseen), lisääaine		bindemedel
126	producer	producteur	Hersteller	productor	producent	Producent	tuottaja		producent
127	proximate analysis	Analyse sommaire	Schnellanalyse (Grundanalyse)	Ánalisis inmediato	Proximativ analyse; Hovedanalyse	Proximate analyse	tekninen analysi	Grovanalyse	primäranalys
128	pulverised biofuel	Biocombustible pulvérisé	pulverisierte Biobrennstoffe	Biocombustible pulverizado	Formalet biobränsel	verpulverte biobrandstof	jauhettu biopoluttoaine (pöly)		finmalt biobränsle
129	quality	qualité	Qualität	calidad	kvalitet	Kwaliteit	laatu		kvalitet
130	quality assurance	assurance qualité	Qualitätssicherung	Aseguramiento de calidad	kvalitetssikring	Kwaliteitsverzekering	laadunvarmistus		kvalitetssäkring
131	quality control	contrôle de la qualité	Qalitätslenkung	Control de calidad	kvalitetskontrol	Kwaliteitscontrole	laadunohjaus		kvalitetskontroll
132	recovered construction wood	bois de construction de récupération	recyceltes Bauholz	Madera de construcción recuperada	Brugt konstruktionstræ	teruggewonnen constructiehout	kierrätetty rakennuspuu		återvunnet konstruktionsvirke

	English	French	German	Spanish	Danish	Dutch	Finnish	Norwegian	Swedish
133	repeatability	répétabilité	Wiederholpräzision	repetibilidad	repeterbarhed	herhaalbaarheid	toistettavuus		repeterbarhet
134	reproducibility	reproductibilité	Vergleichspräzision	reproducibilidad	reproducerbarhed	Reproduceerbaarheid	uusittavuus		reproducerbarhet
135	retailer	détailleur	Einzelhändler	minorista		Handelaar	jälleenmyyjä		återförsäljare
136	rotary screen	Tamis rotatif	Trommelsieb	tamiz rotatorio	Roterende sold	Roterende scheider	rumpuseula		trumsåll
137	sample	échantillon	Probe	Muestra, probeta	Prøve	Monster	näyte		prov
138	sample preparation	préparation de l'échantillon	Probenvorbereitung	Preparación de muestra	prøveforbehandling	Monster voorbehandeling	näytteen käsittely		
139	sampling	échantillonnage	Probenahme	muestreo	prøvetagning	Monsternavn	näytteenotto		provtagning
140	sampling form	forme de l'échantillonnage	Probenahmeprotokol	Forma de muestreo		Monsternavn formulier	näytteen muoto		
141	sampling plan	plan d'échantillonnage	Probenahmeplan	Plan de muestreo	prøvetagningsplan	Monsternavn plan	näytteenottosuunnitelma		
142	sampling record	registre de l'échantillonnage	Probenahmebericht	Registro de muestreo	Prøvetagningsrapport	Monsternavn rapport	näytteenottoluetelo		
143	sample size reduction	réduction de la taille de l'échantillon	Reduktion der Partikelgröße	Reducción del tamaño de la muestra; reducción de tamaño	Kornstørrelsesreduktion; størrelsesreduktion	monstergrootte-verkleining; verkleining	näytteen jakaminen, näyttekoon pienentäminen		reduktion av provets partikelstorlek
144	sawdust	Sciure	Sägespäne	Serrín	Savsmuld	Zaagsel	sahanpuru	Sagflis	sågspån
145	short rotation trees	Arbres à croissance rapide	Bäume aus Kurzumtrieb	Árboles en turno corto	Energiskov	korte omloop bossen	lyhytkiertopuut		snabbväxande träd
146	shredded biofuel	Biocombustible déchiqueté	geschredderte Biobrennstoffe	Biocombustible triturado	Sønderdelt biobrændsel	versnipperde biobrandstof	revitty, pilkottu biopoltoaine	Såldet biobrensel	krossat eller rivet biobränsle
147	size analysis sample	échantillon pour analyse granulométrique	Analyseprobe für die Partikelgrößenverteilung	Muestra para el análisis de tamaño	Prøve til sigteanalyse	monster voor deeltjesgrootte analyse	partikkkelikokoäyte, seulontanäyte	Bakhom	prov för partikelstorleksbestämning
148	slabs	Dosses	Schwarze	Costeros	Skaller	aanzaagdelen /aflopers	sahauspinnat, losot		avkap, justerändra, splittved
149	smallwood	Bûchette	Kleinholz	Madera pequeña	Brænde	Kleinholz	pienpuu, pilke	Fastbiobrensel	småved
150	solid biofuel	Biocombustible solide	feste Biobrennstoffe	Biocombustible sólido	Fast biobrændsel	Vaste biobrandstoffen	kiinteä biopoltoaine	Fastvolum	fast biobränsle
151	solid volume	Volume réel	Festvolumen (Festmeter)	Volumen sólido	Fast masse	massief volume	klintotilavuus	Løsvolum	fastvolym
152	stacked volume	Volume d'encombrement	Raumvolumen (Raummeter)	Volumen apilado	Stablet rummeter	gestapeld volume	pinotilavuus		travvolym
153	stemwood	Grumes	Stammholz	Fuste, madera de tallo, madera de tronco	Stammetræ	stamhout	runkopuu		stamved
154	stemwood chips	plaquettes issues de grumes	Hackschnitzel aus Stammholz, Hackgut aus Stammholz	Astillas de fuste, astillas de tronco de madera	Stammetræsflis	stamhoutsnippers	rankahake		stamvedsflis
155	stump	souche	Stumpf	Tocón	Stød	Stronk	kanto		stubbe

	English	French	German	Spanish	Danish	Dutch	Finnish	Norwegian	Swedish
156	sub-lot	sous-lot	Teilpartie	Sublote	Prøvetagningsparti	sub-partij	toimitetun erän osa, analysoitavan erän osa		del av parti (som ska kvalitetskontrolleras)
157	sub-sample	sous-échantillon	Teilprobe	Submuestra	Delprøve	deelmonster	osanäyte		delprov
158	supplier	fournisseur	Lieferant	suministrador	leverandør	Leverancier	toimittaja		leverantör
159	supply chain	chaîne d'approvisionnement	Lieferkette	Cadena de suministro	forsyningskæde	Aanvoerketen	toimitusketju		
160	test portion	prise d'essai	Prüfmenge	Porción para ensayo	Analyseportion	Testmonster	testaukseen/analysointiin tarkoitettu analyysinäytteen osa		del av laboratorieprov (för specifik analys)
161	test sample	échantillon pour essai	Versuchsprobe	Muestra de ensayo	test prøve	Test monster			
162	thinning residues	Sous-produits d'éclaircie	Durchforstungs-rückstände	Residuos de claras	Tyndingstræ	dunningsresten	harvennuksien hakkutähheet	Tynningsrester	röjningsrester / gallningsrester
163	total ash	Teneur en cendre	Gesamtgehalt an Asche; Aschegehalt	Ceniza total	Total aske	totaal as	kokonaistuhkapi-toisuus	Askeinnhold	askhalt
164	total carbon	Teneur en carbone	Gesamtgehalt an Kohlenstoff	Carbón total	Total kulstof	totaal koolstof	Kokonaishilli-pitoisuus	Karboninnhold	Kolhalt
165	total chlorine	teneur en chlore	Gesamtgehalt an Chlor	Cloro total	Total chlor	Totaal chloor	kokonaisklori-pitoisuus		
166	total hydrogen	Teneur en hydrogène	Gesamtgehalt an Wasserstoff	Hidrógeno total	Total brint	totaal waterstof	kokonaivety-pitoisuus	Hydrogeninnhold	Vätehalt
167	total mass	masse totale	Gesamtmasse	Masa total	Total masse	Totaal massa	kokonaismassa		
168	total moisture	Taux d'humidité	Gesamtgehalt an Wasser; Wassergehalt	Humedad total	Total vand	totaal vocht	kokonaiskosteuspitoisuus	Fuktighetsinnhold	Fukthalt
169	total nitrogen	Teneur en azote	Gesamtgehalt an Stickstoff	Nitrógeno total	Total kvælstof	totaal stikstof	kokonaistypipitoisuus	Nitrogeninnhold	Kvävehalt
170	total oxygen	Teneur en oxygène	Gesamtgehalt an Sauerstoff	Oxígeno total	Total ilt	totaal zuurstof	kokonaishappipitoisuus	Oksygeninnhold	Syrehalt
171	total sulphur	Teneur en soufre	Gesamtgehalt an Schwefel	Azufre total	Total svovl	totaal zwavel	kokonaisrikkipitoisuus	Svovelinnhold	Svavelhalt
172	tree section	Houpiers démembrés/ cimes démembrées	Baumabschnitt	Troza con ramas, sección de árbol	Træ dele	Boomdeel	osapuu	Stammeseksjoner	Träddel
173	ultimate analysis, elementary analysis	Analyse élémentaire	Elementaranalyse	Ánalisis elemental	Ultimativ analyse; Elementær analyse	ultimate analyse, elementaire analyse	alkuaineanalyysi, elementaarianalyysi	Totalanalyse	elementaranalys
174	used wood	Bois usagé	Gebrauchtholz	Madera usada	Brugt træ	gebruikt hout	käytetty puu kai puutuote, kierrätyspuu		använt virke, returträ
175	viscose residues	Sous-produits de la pâte à dissoudre	Rückstände der Viskoseerzeugung	Residuos de la fabricación de la viscosa	Viscoserester	viscose-reststoffen	viskoositähteet		viskosrester
176	volatile matter	Matière volatile	flüchtige Bestandteile	Materia volátil	Flygtige bestanddele	vluchtige bestanddelen	haihtuval aineet	Flyktig stoff	flyktiga ämnén

	English	French	German	Spanish	Danish	Dutch	Finnish	Norwegian	Swedish
177	volume	Volume	Volumen	Volumen	Volumen	Volume	tilavuus	Volum	volymp
178	water soluble content	contenu soluble dans l'eau	wasserlöslicher Gehalt	Contenido soluble en agua		Deel oplosbaar in water	vesiliukoinen osa		
179	wet basis	Sur humide/sur brut	Bezugsbasis Feuchtmasse	Base húmeda o base fresca	Våd basis	natte basis	määräpainosta		vått tillstånd
180	whole tree	Arbre entier	Vollbaum	Árbol apeado, árbol entero	Hetræ	gehele boom	kokopuu, juurakko poislukien	Heltre	helträd
181	whole-tree chips	Plaquettes issues d'arbre entier	Holzhackschnitzel aus Vollernteverfahren, Hackgut aus Vollernteverfahren	Astillas procedentes de árbol entero	Heltræsfis	snippers van de gehele boom	kokopuuhake	Heltreflis	helträdsfis
182	wood chips		Holzhackschnitzel, Hackgut ¹⁾	Astillas	Træfis	houtsnippers	puuhake		träffis
183	wood fuels, wood based fuels, wood-derived biofuels	Combustibles ligneux	Holzbrennstoffe; holzbasierter Brennstoffe	Combustibles de madera, biocombustibles derivados de madera	Træbrændsel	houtbrandstoffen, op hout gebaseerde brandstoffen, van hout afgeleide brandstoffen	puupolttoaineet, puuperäiset polttoaineet	Trebensel	träbränslen
184	wood processing industry by-products and residues	Sous-produits des industries de la transformation du bois	Industrierestholz	Residuos y sub-productos de la industria de la madera	Restprodukter fra træindustri	reststoffen uit de houtverwerkende industrie	puujalostusteollisuuden sivutuotteet ja tähteet		träindustriester, rester från träindustri
185	wood shavings; cutter shavings	Copeaux	Hobelspane	Virutas	Træspåner / Høvlspåner	houtschaafsel, snijmachineschaafsel	puulastut, höyläystastut	Høvelspon	(hyvel)spán
186	woody biomass	Biomasse ligneuse	Holzartige Biomasse	Biomasa leñosa	Træagtig biomasse	houtachtige biomassa	puubiomassa	Treibiomasse	träbiomassa

1) Austrian expression.

Annex B
(informative)

List of terms defined by CEN/TS 15357:2006 – Solid recovered fuels

Identical definitions within CEN/TS 15357:2006	Modified definitions within CEN/TS 15357:2006	Additional definitions within CEN/TS 15357:2006
as received	biomass	biodegradable
ash content		biogenic
ash deformation temperature		briquette
ash flow temperature		chips
ash fusibility		classification of solid recovered fuel
ash hemisphere temperature		coefficient of variation
ash sphere temperature		co-incineration
biofuel		co-incineration plant
bridging		collection tray
bulk density		component of solid recovered fuel
calorific value		composition of solid recovered fuel
combined sample		digestion
common sample		digestion vessel
delivery agreement		drying
dry		effective increment size
dry ash free		effective sample size
dry matter		emission
dry matter content		fluff
energy density		fraction separation
flowability		fuel characterisation
fuel		fundamental error
gross calorific value		halogen content
increment		heterogeneity
laboratory sample		homogenisation
lot		homogeneity
mass-reduction		incineration
mechanical durability		incineration plant
moisture		material flow
net calorific value		metallic aluminium
nominal top size		microwave unit
over size particles		mixed municipal waste
particle		incineration
particle density		incineration plant
particle size		material flow
particle size distribution		metallic aluminium
point of delivery		microwave unit
producer		oxygen combustion
proximate analysis		particle size reduction

Identical definitions within CEN/TS 15357:2006	Modified definitions within CEN/TS 15357:2006	Additional definitions within CEN/TS 15357:2006
sample		pellet
sample preparation		pre-treated waste
sampling		probalistic sample
sampling form		random sampling
sampling plan		renewable energy sources
sampling record		sample container
size analysis sample		separate collection
solid biofuel		shredding
solid volume		solid recovered fuel
test portion		sorting
total carbon		sorting at source
total hydrogen		specification
total moisture		specification of solid recovered fuels
total nitrogen		stacked volume
total oxygen		test sample
total sulphur		total organic carbon
ultimate analysis		XRF
volatile matter		waste
		waste supplier

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email bsmusales@bsigroup.com.

BSI Group Headquarters

389 Chiswick High Road London W4 4AL UK

Revisions

Our British Standards and other publications are updated by amendment or revision. We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

Copyright

All the data, software and documentation set out in all British Standards and other BSI publications are the property of and copyrighted by BSI, or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means – electronic, photocopying, recording or otherwise – without prior written permission from BSI.
