Annex C (normative) Risk considerations and awareness	26
Bibliography	28

Summary of pages

This document comprises a front cover, and inside front cover, pages i to iv, pages 1 to 28, an inside back cover and a back cover.

Foreword

Publishing information

This British Standard is published by BSI Standards Limited, under licence from The British Standards Institution, and came into effect on 30 April 2020. It was prepared by Subcommittee CH/173/1, *Wheelchairs*, under the authority of Technical Committee CH/173, *Assistive products for persons with disability*. A list of organizations represented on these committees can be obtained on request to their secretary.

Supersession

This British Standard supersedes [BS 8603:2013](#), which is withdrawn.

Information about this document

This British Standard is intended for transport operations where risk assessment of individual passenger needs has taken place as part of an overall risk management process. It is intended to be used in harmony with other risk assessment processes that might already be in place.

The term “passport” has been adopted, and it has been noted that the term has connotations of cross-boundary freedom of movement. Whilst the intention of this standard is to provide guidelines for passport schemes operated on a local basis, extensive adoption of the scheme across the UK will facilitate easier and safer travel.

This publication can be withdrawn, revised, partially superseded or superseded. Information regarding the status of this publication can be found in the Standards Catalogue on the BSI website at bsigroup.com/standards, or by contacting the Customer Services team.

Where websites and webpages have been cited, they are provided for ease of reference and are correct at the time of publication. The location of a webpage or website, or its contents, cannot be guaranteed.

Use of this document

As a code of practice, this British Standard takes the form of guidance and recommendations. It should not be quoted as if it were a specification and particular care should be taken to ensure that claims of compliance are not misleading.

Any user claiming compliance with this British Standard is expected to be able to justify any course of action that deviates from its recommendations.

It has been assumed in the preparation of this British Standard that the execution of its provisions will be entrusted to appropriately qualified and experienced people, for whose use it has been produced.

Presentational conventions

The provisions of this standard are presented in roman (i.e. upright) type. Its recommendations are expressed in sentences in which the principal auxiliary verb is “should”.

Commentary, explanation and general informative material is presented in smaller italic type, and does not constitute a normative element.

Where words have alternative spellings, the preferred spelling of the Shorter Oxford English Dictionary is used (e.g. “organization” rather than “organisation”).

As a code of practice, this British Standard takes the form of guidance and recommendations. It should not be quoted as if it were a specification and particular care should be taken to ensure that claims of compliance are not misleading.

Any user claiming compliance with this British Standard is expected to be able to justify any course of action that deviates from its recommendations.

It has been assumed in the preparation of this British Standard that the execution of its provisions will be entrusted to appropriately qualified and experienced people, for whose use it has been produced.

Presentational conventions

The provisions of this standard are presented in roman (i.e. upright) type. Its recommendations are expressed in sentences in which the principal auxiliary verb is “should”.

Commentary, explanation and general informative material is presented in smaller italic type, and does not constitute a normative element.

Where words have alternative spellings, the preferred spelling of the Shorter Oxford English Dictionary is used (e.g. “organization” rather than “organisation”).

Foreword

Publishing information

This British Standard is published by BSI Standards Limited, under licence from The British Standards Institution, and came into effect on 30 April 2020. It was prepared by Subcommittee CH/173/1, *Wheelchairs*, under the authority of Technical Committee CH/173, *Assistive products for persons with disability*. A list of organizations represented on these committees can be obtained on request to their secretary.

Supersession

This British Standard supersedes [BS 8603:2013](#), which is withdrawn.

Information about this document

This British Standard is intended for transport operations where risk assessment of individual passenger needs has taken place as part of an overall risk management process. It is intended to be used in harmony with other risk assessment processes that might already be in place.

The term “passport” has been adopted, and it has been noted that the term has connotations of cross-boundary freedom of movement. Whilst the intention of this standard is to provide guidelines for passport schemes operated on a local basis, extensive adoption of the scheme across the UK will facilitate easier and safer travel.

This publication can be withdrawn, revised, partially superseded or superseded. Information regarding the status of this publication can be found in the Standards Catalogue on the BSI website at bsigroup.com/standards, or by contacting the Customer Services team.

Where websites and webpages have been cited, they are provided for ease of reference and are correct at the time of publication. The location of a webpage or website, or its contents, cannot be guaranteed.

This British Standard supersedes [BS 8603:2013](#), which is withdrawn.

Information about this document

This British Standard is intended for transport operations where risk assessment of individual passenger needs has taken place as part of an overall risk management process. It is intended to be used in harmony with other risk assessment processes that might already be in place.

The term “passport” has been adopted, and it has been noted that the term has connotations of cross-boundary freedom of movement. Whilst the intention of this standard is to provide guidelines for passport schemes operated on a local basis, extensive adoption of the scheme across the UK will facilitate easier and safer travel.

This publication can be withdrawn, revised, partially superseded or superseded. Information regarding the status of this publication can be found in the Standards Catalogue on the BSI website at bsigroup.com/standards, or by contacting the Customer Services team.

Where websites and webpages have been cited, they are provided for ease of reference and are correct at the time of publication. The location of a webpage or website, or its contents, cannot be guaranteed.

Use of this document

As a code of practice, this British Standard takes the form of guidance and recommendations. It should not be quoted as if it were a specification and particular care should be taken to ensure that claims of compliance are not misleading.

Any user claiming compliance with this British Standard is expected to be able to justify any course of action that deviates from its recommendations.

It has been assumed in the preparation of this British Standard that the execution of its provisions will be entrusted to appropriately qualified and experienced people, for whose use it has been produced.

Presentational conventions

The provisions of this standard are presented in roman (i.e. upright) type. Its recommendations are expressed in sentences in which the principal auxiliary verb is “should”.

Commentary, explanation and general informative material is presented in smaller italic type, and does not constitute a normative element.

Where words have alternative spellings, the preferred spelling of the Shorter Oxford English Dictionary is used (e.g. “organization” rather than “organisation”).

Foreword

Publishing information

This British Standard is published by BSI Standards Limited, under licence from The British Standards Institution, and came into effect on 30 April 2020. It was prepared by Subcommittee CH/173/1, *Wheelchairs*, under the authority of Technical Committee CH/173, *Assistive products for persons with disability*. A list of organizations represented on these committees can be obtained on request to their secretary.

Supersession

This British Standard supersedes [BS 8603:2013](#), which is withdrawn.
